*\*In 1986, pharmaceutical companies producing vaccines were given full federal protection from lawsuits resulting from vaccine injury or death via the Childhood Vaccine Act passed by Congress. If vaccines are so safe, why did they need a law to protect from liability?*

*After this law, vaccines became **HIGHLY** profitable. There are almost 300 vaccines in development, and mandatory vaccine laws for children – and **ADULTS** – being pushed in most states.*

*The US gives 2-3x more vaccines to children than most developed countries, yet we have skyrocketing rates of childhood issues that are **NOT** seen in other countries. Things like asthma, childhood diabetes, food allergies, childhood leukemia, developmental delays, tics, ADHD, autism, lupus, arthritis, eczema, epilepsy, Alzheimers, brain damage, etc... **It's NOT a coincidence***

*Vaccines contain toxic chemicals that do **NOT** belong in our bodies, such as aluminum, (known to cause brain and developmental damage even in small doses), polysorbate 80, MSG and formaldehyde (known to cause cancer in humans).*
